DES. No. 52 of 1930

GOVERNMENT OF KARNATAKA

FULLY REVISED ESTIMATES
OF
PRINCIPAL CROPS IN KARNATAKA
FOR
THE YEAR 1936-37

Issued by
DIRECTORATE OF ECONOMICS AND STATISTICS
BANGALORE
1930

P R E F A C E

The official estimates of area, production and yield rates of all the important crops grown in Karnataka State are released annually in the form of Fully Revised Estimates by the Directorate of Economics & Statistics, Government of Karnataka, Bangalore.

The current publication contains the Final tables on area, production and yield rates of principal crops grown in Karnataka during 1986-87. This is the Thirty Second issue in the series. The area estimates are based on the Annual Season and Crop Reports received from the districts. The results obtained from the conduct of Crop Cutting Experiments, wherever available, are used in building the production estimates. The data is presented districtwise for the year 1986-87. Summary tables containing data for the years 1982-83 to 1986-87 are also presented in order to enlarge its utility. It is hoped that this publication will be of immense use to administrators, planners, and research workers. Suggestions for improvement of this publication are welcome.

This publication has been prepared in the Agricultural Statistics Wing of the Directorate under the overall technical guidance and supervision of Shri. V.Balasubramanian, Joint Director, Shri. S.A.Uppund, Assistant Director (ASR) and Shri. R.Rangaswamy, Assistant Statistical Officer were responsible in bringing out this publication.

Bangalore,

Dated: 27-6-1989

H.S. NAGARAJ
DIRECTOR.

C O N T E N T S

Sl. No.	Name of the Crop :	Page No:
---------	--------------------	----------

1	2	3
---	---	---

PART-1 : CEREAL CROPS :

1. Comparative Statement for the last five years.	1.1 - 1.3
2. State Abstract for 1986-87	1.4 - 1.5
3. Paddy	1.6 - 1.15
4. Rice ✓	1.16 - 1.25
5. Jowar ✓	1.26 - 1.33
6. Bajra ✓	1.34 - 1.38
7. Maize ✓	1.39 - 1.42
8. Ragi ✓	1.43 - 1.50
9. Minor Millets ✓	1.51 - 1.57
10. Total Kharif Cereals	1.58
11. Wheat ✓	1.59 - 1.61
12. Total Rabi Cereals	1.62
13. Total Summer Cereals	1.63
14. Total Cereals & Small Millets	1.64
15. Total Foodgrains	1.65

PART-2 : PULSES CROPS :

1. Comparative Statement for the last five years	2.1 - 2.3
2. State Abstract for 1986-87	2.4
3. Tur	2.5
4. Horsegram - Kharif	2.6
5. Blackgram - Kharif	2.7
6. Greengram - Kharif	2.8
7. Avare - Kharif	2.9
8. Other Kharif Pulses	2.10
9. Total Kharif Pulses (excluding Tur)	2.11
10. Total Kharif Pulses (including Tur)	2.12
11. Bengalgram (Gram)	2.13
12. Horsegram - Rabi/Summer	2.14
13. Blackgram - Rabi/Summer	2.15
14. Greengram - Rabi/Summer	2.16
15. Avare - Rabi/Summer	2.17
16. Other Pulses - Rabi/Summer	2.18
17. Total Rabi Pulses (excluding Bengalgram)	2.19

18. Total Rabi Pulses (including Bengalgram)	2.20
19. Total Pulses	2.21
20. Total Foodgrains	2.22

PART -3 OILSEED CROPS :

1. Comparative Statement for the last five years	3.1 - 3.2
2. State Abstract for 1986-87	3.3
3. Groundnut ✓	3.4 - 3.6
4. Sesamum ✓	3.7
5. Rape & Mustard Seeds ✓	3.8
6. Nigerseed	3.9
7. Safflower ✓	3.10
8. Castor ✓	3.11
9. Linseed	3.12
10. Sunflower ✓	3.13
11. Soyabean	3.14
12. Total Oilseeds	3.15

PART -4 COMMERCIAL CROPS :

1. Comparative Statement for the last five years	4.1
2. State Abstract for 1986-87	4.2
3. Sugarcane	4.3
4. Cotton	4.4 - 4.7
5. Tobacco	4.8

PART -5 PLANTATION & HORTICULTURAL CROPS :

1. Comparative Statement for the last five years	5.1 - 5.2
2. State Abstract for 1986-87	5.3
3. Banana	5.4
4. Papaya	5.5
5. Cashewnut	5.6 - 5.11
6. Potato	5.12
7. Tapioca	5.13
8. Onion	5.14
9. Sweet potato	5.15
10. Coconut	5.16

1 2 3
PART - 6 : CONDIMENTS & SPICES CROPS :

1. Comparative Statement for the last five years	6.1 - 6.2
2. State Abstract for 1986-87	6.3
3. Chillies	6.4
4. Ginger	6.5
5. Turmeric	6.6
6. Cardamum	6.7
7. Garlic	6.8
8. Black Pepper	6.9
9. Arecanut	6.10 - 6.11
10. Coriander	6.12

PART - 7 : MISCELLANEOUS CROPS :

1. Comparative Statement for the last five years	7.1
2. State Abstract for 1986-87	7.2
3. Mesta	7.3
4. Sunhemp	7.4

PART - 8 : INDEX Numbers of Area, Production
and Productivity for the years
1982-83 to 1986-87. 8.1 - 8.5

NKS/-

NOTES ON TABLES :

1. Production of Paddy (Rice), Jowar, Bajra, Maize, Ragi, Wheat, Navane, Sava, Haraka, Tur, Gram, Horsegram, Blackgram, Greengram, Groundnut, Sesamum, Sunflower, Safflower, Linseed, Castor, Sugarcane, Cotton and Tobacco crops are based on the results of the Crop Cutting Experiments conducted under Crop Estimation Survey (CES).

2. Production of Potato, Onion and Banana Crops are based on the results of the Crop Cutting Experiments conducted under Fruits and Vegetables Survey. Production of Coconut, Arecanut and Cashewnut Crops are based on the results of surveys conducted in selected districts a few years ago and estimates of production for the remaining crops are based on traditional methods.

3. The unit of measurement of production is as follows :

Cotton - Bales of 170 Kgs.
Mesta - Bales of 180 Kgs.
Black Pepper & Dry Ginger - Quintals
Coconut - thousand nuts
All other Crops - Metric tonnes.

4. Production of Rice is given in terms of raw rice, that of Groundnut in terms of nuts in shells, Sugarcane in terms of Cane.

5. Production estimates for the district are obtained by multiplying the area figures by the respective yield rates in respect of individual crops. A bund correction of five percent is applied in the case of CES crops mentioned in para one of this note. The division level and State level production estimates are obtained by the sum of individual districts and division figures respectively.

6. Seasonwise production estimates under each crop, total cereals and small millets, total pulses, total foodgrains and total oilseeds are obtained by the sum total of the respective variety or season or the individual crop, as the case may be. The pooled average yield in such cases will be obtained by dividing the production figures by the respective area figures after applying necessary bund correction, as the case may be.

NOTES ON TABLES

Production of Rubber (Latex), Bajra, Maize, Paddy, Wheat, Jowar, Sorghum, Tur, Gram, Cowpeas, Blackgram, Green Gram, Groundnut, Sesame, Sunflower, Castor, Cotton, etc.

7. In the case of C.E.S. Crops, wherever district yield rates are not available, the concerned division average yield rate is adopted for working-out the production estimates of such districts. In the absence of the division average yield, the State average yield is taken as the average yield of that division and district.

NKS/-

- Cotton - Sales of 170 Kcs.
- Maize - Sales of 100 Kcs.
- Black Pepper & Dry Ginger - Quantities
- Coconut - thousands units
- All other crops - Metric tonnes.

Production of rice is given in terms of raw rice, that of groundnut in terms of nuts in shells, sugarcane in terms of cane. Production estimates for the districts are obtained by multiplying the area figures by the respective yield rates in respect of individual crops. A bond correction of five percent is applied in the case of C.E.S. crops mentioned in para one of this note. The division level and State level production estimates are obtained by the sum of individual districts and division figures respectively.

Production estimates under each crop, total, are given in small figures, total production and area in small figures, total production and area in large figures are obtained by the sum total of the respective figures of each of the individual crops, as the case may be. The pooled average yield in main crops will be obtained by dividing the production figures by the respective area figures after applying necessary bond correction, as the case may be.

Explanatory note on source of data and methodology of compilation

Area coverage under crops together with land use data is compiled from the source document of RTC (Pahani) recorded by Village Accountant and submitted to the Tahsildars. The villagewise crop area coverage together with other land use particulars are compiled by the taluk level statistical inspector of Directorate of Economics & Statistics and the taluk abstract is submitted to District Statistical Officer who compiles the abstract from these taluk data and submits district abstract to Directorate of Economics and Statistics. At the state level, the district-wise data submitted by the DSOs is compiled in the Annual Season and Crop Report and the same is adopted for use in this report for crop area coverage data.

2. The season-wise and variety-wise breakup under the crop is also furnished by the DSOs as per the technical instructions issued from time to time. The data with reference to the irrigation as well as High Yielding/HB varieties is also counter checked with the survey data results from the Timely Reporting Scheme, ICS scheme and the reconciliation of crop area statistics and the fully revised data is adopted in the report.

3. As regards estimation of production, the scientific methodology of estimating productivity through the conduct of crop cutting experiments is adopted. The productivity data is obtained through the Crop Estimation Surveys conducted on annual basis with seasonwise breakup in respect of major crops. Of the 49 Crop estimates furnished in this FRE report, for as many as 26 crops, CES productivity results are available and adopted. These 26 CES crops are distributed at 9 cereals, 5 pulses, 6 oilseeds, 3 commercial crops and 3 plantation crops. In respect of the remaining 23 crops no Crop Estimation Survey estimates are available as no crop cutting experiments are planned and conducted. For these crops the methodology adopted is through the system of traditional enquiry from knowledgeable farmers and is therefore subject to limitation of subjectivity. In order to eliminate/minimise degree of subjectivity

in this system of productivity data generation of non CES crops, the methodology of averaging over three years data (triennium) is adopted. More detailed information on the scope content, methodologies and estimating procedures of the crops covered under Crop Estimation Surveys (CES) may be seen in the manual on crop estimation surveys and also the annual CES reports brought out periodically.

4. In respect of index numbers data is presented for 38 crops and the methodologies adopted for its construction are based on the guidelines issued by the Government of India, Economic and Statistical Directorate (ECOSTAT) adopting the base period of triennium ending 1969-70. This methodology ensures inter state comparability of Index Numbers constructed and published.
