

GOVERNMENT OF KARNATAKA

FULLY REVISED ESTIMATES
OF
PRINCIPAL CROPS IN KARNATAKA
FOR
THE YEAR 1990-91

Issued by
DIRECTORATE OF ECONOMICS AND STATISTICS
BANGALORE
1993

P R E F A C E

The official estimates of area, production and average yield of principal crops grown in Karnataka are being released annually in the form of Fully Revised Estimates by the Directorate of Economics and Statistics, Government of Karnataka, Bangalore. The current publication for the year 1990-91 is the thirty sixth issue in the series.

2 This publication embodies the final tables on area, production and average yield of principal crops grown in Karnataka during the year 1990-91. The area estimates are based on Annual season and Crop Reports received from the Tahsildars through the District Statistical Officers. The results of the crop estimation survey 1990-91 wherever available, have been used in building up the production estimates. From the year 1990-91, area, production and productivity of major cereal crops and groundnut are given for irrigated and unirrigated areas separately.

3 The data is presented district-wise for the year 1990-91. Summary tables embodying state level data for the years 1986-87 to 1990-91 are also presented. It is hoped that this publication will be of immense use to the Administrators, Planners and Research Workers. Suggestions for improvement on this publication are welcome.

This publication is prepared in the Agricultural Statistics Division of the Directorate under the overall technical guidance and supervision of Smt N.V.Sharadamma, Joint Director I/c, Agricultural Statistics Division, Shri H.B.Siddegowda, Assistant Statistical Officer, and Smt B.V.Satyavathi, Enumerator are responsible in bringing out this publication. For the first time, production estimates are worked out on computer housed in this Directorate.

PLACE: BANGALORE
DATED: 16/01/1993

CORIANDER	- 242

9. INDEX NUMBERS OF AREA, PRODUCTION AND PRODUCTIVITY OF PRINCIPAL CROPS IN KARNATAKA, 1986-91	- 243 - 246
--	-------------

NOTES ON TABLES

1. Fully Revised Estimates of Area, Production and Average yield of Principal Crops grown in Karnataka State during the year 1990-91 are presented in the tables contained in this publication.

2. The Village-wise crop area coverage together with other land use particulars are compiled from the source document of RTC (Pahani) recorded and submitted by the Village Accountants to the Tahsildars, at the taluka level, based on which the Statistical Inspector of the Directorate of Economics and Statistics attached to the Taluk Office prepares annual season and crop report (ASCR) for the taluk and submits it to District Statistical Office. The District Statistical Officer, in turn, consolidates the Annual Season and Crop Report for the district and forwards it to the Directorate of Economics and Statistics. At the State level, the Annual Season and Crop Report is compiled based on the district reports and the same is adopted for the use in this publication for crop area coverage data.

3. At present production estimates are prepared in respect of 49 principal crops grown in Karnataka. Average yield data estimated through the scientific analysis of crop cutting experiment results are adopted for working out the production estimates in respect of the following 27 crops which are covered under Crop Estimation Survey (CES). Area, yield and production estimates for Rice, Jowar, Bajra, Maize, ragi, Wheat and Groundnut crops are given for irrigated and unirrigated areas separately.

CEREALS : 1. Rice, 2. Jowar, 3. Bajra, 4. Maize, 5. Ragi, 6. Wheat, 7. Haraka, 8. Navane and 9. Save.

PULSES : 1. Tur, 2. Gram, 3. Horsegram, 4. Blackgram and 5. Greengram.

OILSEEDS : 1. Groundnut, 2. Sesamum, 3. Safflower, 4. Sunflower, 5. Castor and 6. Linseed.

COMMERCIAL/ FIBRE CROPS : 1. Sugarcane, 2. Cotton and 3. Tobacco.

HORTICULTURAL CROPS : 1. Banana, 2. Onion, 3. Potato and 4. Turmeric.

4. In respect of the following 22 crops no crop estimation survey estimates are available as no crop cutting experiments are planned. For these non-CES, yield rates based on traditional methods are adopted to workout the production estimates.

CEREALS : 1. Baragu, 2. Badlivari, and 3. Other small Millets.

PULSES : 1. Avare and 2. Other pulses.

OILSEEDS : 1. Nigarseed, 2. Rape and Mustard and 3. Soyabean.

HORTICULTURAL & PLANTATION CROPS 1. Papaya, 2. Cashewnut, 3. Tapioca, 4. Sweet Potato, and 5. Coconut.

CONDIMENTS & SPICES CROPS : 1. dry Chillies, 2. Dry Ginger, 3. Cardamum, 4. Garlic, 5. Black Pepper, 6. Arecanut and 7. Coriander.

FIBRE CROPS : 1. Mesta and 2. Sunhemp.

5. Production estimates for the district are obtained by multiplying the area figures by the respective yield rates in respect of individual crops. A bund correction of five percent is applied in receipt of cereals, pulses, oilseeds and commercial crops which are covered under crop estimation survey. (In other words five percent of area is deducted out of the total area under the crop towards bunds, water channels, foot tracks, etc.). The divisional level and state level production estimates are obtained by the sum of individual district and division figures respectively.

6. Seasonwise production estimates under each crop, cereals (all crops/seasons) Pulses (all crops/seasons), foodgrains, Oilseeds (all crops), are obtained by the sum total of the respective variety or season or the individual crop, as the case may be. The pooled average

yield in such cases is obtained by dividing the production figures by the respective area figures after applying necessary bund correction as the case may be.

7. In the case of CES crops, wherever district yield rates are not available, the concerned division average yield rate is adopted for working out the production estimates of such districts. In the absence of the division average yield, the state average yield is taken as the average yield of the division and district.

8. Production of Rice is given in terms of raw rice, that of Groundnut in terms of nuts in shells and Sugarcane in terms of cane.

9. The unit of measurement of production is as follows:

COTTON - Bales of 170 Kgs in lint form.

NESTA - Bales of 180 Kgs.

BLACK PEPPER & DRY GINGER - Quintals.

COCONUT - Thousand nuts.

ALL OTHER CROPS - Metric Tonnes.

TABLE-1. Fully Revised Estimates of Area, Production and Average Yield of Principal Crops in Karnataka, 1986-91
