**Fully Revised Estimates  
of  
Principal Crops in Karnataka  
for the year 1995-96**

Directorate of Economics and Statistics  
Bangalore

1997

## **PREFACE**

The official estimates of Area, Production and Productivity of Principal Crops grown in Karnataka are being released annually in the form of Fully Revised Estimates by the Directorate of Economics and Statistics, Government of Karnataka, Bangalore. The current publication for the year 1995-96 is the fortyfirst issue in the series.

This publication presents the final tables on Area, Production and Productivity of principal crops grown in the state during the year 1995-96. As in the previous years, the area estimates are based on Annual season and Crop Reports received from the Tahsildars through the District Statistical Officers and the yield estimates of the major crops based on Crop Estimation Surveys of 1995-96 are adopted in building up the production estimates. From the year 1991-92, Estimates of area, production and productivity of Cotton are given separately for irrigated and unirrigated categories. Besides, seasonwise estimates for irrigated and unirrigated categories are given for Sunflower.

The data is presented districtwise for the year 1995-96. Summary tables embodying State level data for the years from 1991-92 to 1995-96 are also presented. It is hoped that this publication will be of immense use to the Planners and Administrators and also to the Agricultural Researchers.

This publication is prepared in the Agricultural Statistics Division of the Directorate by Sri K.R. Bhat, Assistant Statistical Officer under the overall technical guidance and supervision of Sri S.Nanjunda Rao, Deputy Director and Smt Sukanya, Joint Director.

The report is computerised by Shri J.Shridhar, Programmer (A.S.O) and Shri K.Gajendra, Computer Operator (Enumerator) in the Computer Centre of this Directorate.

Suggestions for improvement of this publication are most welcome.

**Bangalore.**

**Dated : 22-09-1997**

*Ahalya S. Bhat*  
Director

**NOTE ON TABLES**

1. Fully Revised Estimates of Area, Production and Average yield of Principal Crops grown in Karnataka State during the year 1995-96 are presented in the tables contained in this publication.
2. The village-wise crop area coverage together with other land use particulars are compiled from the source document of RTC (Pahani) recorded and submitted by the Village Accountants to the Tahsildars, at the taluka level, based on which the Statistical Inspector of the Directorate of Economics and Statistics attached to the Taluk Office prepares Annual Season and Crop Report (ASCR) for the taluk and submit it through Tahsildar to District Statistical Officer. The District Statistical Officer, in turn, consolidates the Annual Season and Crop Report for the district and forwards it to the Directorate of Economics and Statistics. At the State level, the Annual Season and Crop Report is compiled based on the district reports and the same is adopted in this publication for crop area coverage data.
3. At present production estimates are prepared in respect of 57 principal crops grown in Karnataka. Average yield data estimated through the scientific analysis of crop-cutting experiment results are adopted for working out the production estimates in respect of the following 37 crops which are covered under Crop Estimation Survey (CES) and Crop Estimation Survey on Fruits, Vegetables and Minor Crops for horticultural crops. Area, yield and production estimates for Rice, Jowar, Bajra, Maize, Ragi, Wheat, Bengalgram, Groundnut, Sunflower, Safflower and Cotton crops are given for irrigated and unirrigated areas separately.

**CEREALS:**

1. Rice, 2. Jowar, 3. Bajra, 4. Maize, 5. Ragi, 6. Wheat, 7. Haraka, 8. Navane and 9. Save.

**PULSES:**

1. Tur, 2. Gram, 3. Horsegram, 4. Blackgram and 5. Greengram.

**OILSEEDS:**

1. Groundnut, 2. Sesamum, 3. Safflower, 4. Sunflower, 5. Castor and 6. Linseed and 7. Soyabean.

**COMMERCIAL/ FIBRE CROPS:** 1. Sugarcane, 2. Cotton and 3. Tobacco.

**HORTICULTURAL CROPS:** 1. Banana, 2. Onion, 3. Potato, 4. Turmeric, 5. Mango, 6. Grapes, 7. Tomato, 8. Beans, 9. Brinjal, 10. Lemon, 11. Dry Chillies, 12. Guava and 13. Sapota.

4. In respect of the following 20 crops no crop estimation survey estimates are available as no crop-cutting experiments are planned. For these non-CES crops yield rates based on traditional methods are adopted to workout the production estimates.

**CEREALS:**

1. Baragu, 2. Badlivari and 3. Other small Millets.

**PULSES:**

1. Avare and 2. Other Pulses

**OILSEEDS:**

1. Nigarseed, 2. Rape and Mustard.

**HORTICULTURE &  
PLANTATION CROPS:**

1. Papaya, 2. Cashewnut, 3. Tapioca, 4. Sweet Potato and 5. Coconut.

**CONDIMENTS & SPICES  
CROPS:**

1. Dry Ginger, 2. Cardamom, 3. Garlic, 4. Black Pepper, 5. Arecanut and 6. Coriander,

**FIBRE CROPS:**

1. Mesta and 2. Sunhemp.

5. Production estimates for the district are obtained by multiplying the area figures by the respective yield rates in respect of individual crops. A bund correction of five percent is applied in respect of cereals, pulses, oilseeds and commercial crops which are covered under Crop Estimation Survey. In other words five percent of area is deducted out of the total area under the crop towards bunds, water channels, foot tracks etc.

6. In the case of districts not covered by the Crop Estimation Survey, weighted average yield of the districts covered by the survey are adopted for working out the production estimates of such districts.
7. The pooled average yield is obtained by dividing the production figures by the respective area figures after applying necessary bund correction as the case may be.
8. In case of crops not covered by the Crop Estimation Survey one percent Bund correction is applied to the area while working out production.
9. Average yield of Rice, is given in terms of raw Rice, Groundnut in terms of nuts in shells, Sugarcane in terms of cane, Tobacco in terms of leaves, Castor and Sunflower in terms of seeds, Cotton in terms of lint and the remaining Crop Estimation Survey crops in terms of grains only.
10. The unit of measurement of production is as follows:

<b>COTTON</b>	- Bales of 170 Kgs, in lint form.
<b>MESTA</b>	- Bales of 180 Kgs.
<b>BLACKPEPPER &amp; DRY GINGER</b>	- Quintals.
<b>COCONUT</b>	- Thousand nuts.
<b>ALL OTHER CROPS</b>	- Tonnes.

To be keyed

# From 1994-95 production calculated by applying dry yield rates, for earlier years wet yield rates were used.

- NOTE:- 1) In order to tally with the group/sub-group totals, the figures in the second decimal place have been adjusted while rounding off of the actual figures.
- 2) \* Area, production and average yield of Cashewnut crop refers to Agriculture holdings only.
